Nguyen Bui Man Nhi

Address: HCMC, Vietnam | Phone: (+84)357 050703 | GitHub: nhinbm

Objectives

As a senior Computer Science student at University of Science, I am looking for a Software Developer position where I can apply my knowledge in programming, problem-solving, and software engineering. I aim to contribute to real-world projects, collaborate with experienced teams, and continue growing in a dynamic tech environment.

Education

HCMC UNIVERSITY OF SCIENCE | SEP 2021– PRESENT
Major: Computer Science.
GPA: 9.01 / 10.0.

Experience

BOSCH GLOBAL SOFTWARE TECHNOLOGIES | WEB DEVELOPER INTERN | MAY 2024 – NOV 2024

· Counterfeit Detection Website
  » Maintained codebase and added a domain crawling feature to collect Bosch-related websites, helping the internal team identify counterfeit sources.
  » Helped reduce manual domain searching time for the team, improving reporting efficiency.
  » Worked as a Fullstack Developer using MERN stack.
  » Collaborated with a team of 3 members.

Projects

FUTURE FURNITURE ECOMMERCE WEBSITE | OCT 2023 – JAN 2024
  » Led the frontend development of an e-commerce website for furniture products, focusing on UI/UX and client-side performance.
  » Developed the frontend using ReactJS, styled-components, Material UI, and Redux; also contributed to backend setup with ExpressJS and MongoDB.
  » Collaborated with a team of 5 members.
  » Applied modern technologies and followed a structured development workflow, gaining hands-on experience in fullstack project execution.

CV SEEKER | MAY 2024
  » Took on the role of Data/AI specialist, focusing on building a smart candidate search system.
  » Trained embedding models using Google Colab and integrated LlamaIndex to enhance semantic search capabilities.
  » Collaborated with a 4-member team.
  » Developed a web platform that enables recruiters to efficiently search for suitable candidates based on skills, experience, and profile relevance.

<u>SKILL SWAP LITE | MAY 2025</u>

- » Developed a responsive single-page application where users can list skills to teach and to learn, then browse other users for potential matches.
- » Built user list and profile cards using React, ShadCN UI, and TailwindCSS, with data management via TanStack Query. Integrated Firebase for app configuration and basic hosting.
- » Collaborated with a 6-member team.
- » Focused on clean UI/UX, scalability, and modular component design.

Skills & Abilities

TOEIC: LR 910/990 – SW 330/400.

Activities and Interests

- · Candidates Grab Engineering Bootcamp (2024): Join the contest with CV Seeker Project. We got the 4th prize.
- · ACIIDS Conference (2025): Our research on Machine Unlearning for Person Identification Using Facial Recognition has been accepted.
- · Candidates NAB WeCamp Program (2025): Join the contest with Skill Swap Lite Project. We got the 1st prize.
